Green Journals

International Approved Journals

Journal Information

Journal Title	JOURNAL OF MORPHOLOGY
Publisher	WILEY
ISSN	0362-2525
E-ISSN	1097-4687
Database	Clarivate
Domain	Life Sciences, Physical Sciences

Classification History

Year	A+	A	B	C
2026		✓	✓	
2025		✓	✓	
2024		✓	✓	
2023		✓	✓	
2021/2022		✓	✓	
2020		✓	✓	
2019		✓	✓	
2018		✓		

Classification: The table above shows all journal classifications recorded for each classification year in the Green Journals database. A journal may have more than one classification in the same year.

Recent Articles

Intraskeletal Pathway of the Trigeminal Nerve in Modern Bird Beak: 3D Comparative Anatomy Using the diceCT Method
2026-10-28 Vol. 287 Issue 11
Authors: Noriyuki Wakimizu, Takanobu Tsuihiji
DOI: 10.1002/jmor.70188

Issue Information
2026-10-28 Vol. 287 Issue 11
DOI: 10.1002/jmor.70191

Axial Complex of Deep-Sea Acorn Worm Quatuoralisia malakhovi (Hemichordata, Enteropneusta, Torquaratoridae)
2026-10 Vol. 287 Issue 10
Authors: Olga V. Ezhova, Anastasiya I. Lukinykh, Vladimir V. Malakhov
DOI: 10.1002/jmor.70190

A Continuously-Resolved 3D Organisation of the Rat Stomach
2026-10 Vol. 287 Issue 10
Authors: Savindi Wijenayaka, Mark L. Trew, Alys R. Clark et al.
DOI: 10.1002/jmor.70176

The Evolutionary History of Early Ray-Finned Fishes (Pan-Actinopterygii)
2026-10 Vol. 287 Issue 10
Authors: Jack Stack
DOI: 10.1002/jmor.70181

Functional Adaptations for Load-Bearing in a Dermal Bone: The Pectoral Fin Spine of the Russian Sturgeon (Huso Gueldenstaedtii)
2026-10 Vol. 287 Issue 10
Authors: Esteban Marroquín-Arroyave, Joshua Milgram
DOI: 10.1002/jmor.70187

General Morphology and Neurite Projection Patterns of Supramedullary Neurons in the Cunner, Tautogolabrus adspersus
2026-10 Vol. 287 Issue 10
Authors: Nick Hiza, Jun Liu, Tina Wong et al.
DOI: 10.1002/jmor.70184

Biological Insights From the Osteohistology of a Nile Crocodile
2026-10 Vol. 287 Issue 10
Authors: Ayanda Buso, Maria Eugenia Pereyra, Anusuya Chinsamy
DOI: 10.1002/jmor.70186

Ventral Surface Microanatomy of the Raptor Pes Is Most Strongly Linked to Prey Size and Diet Rather Than Phylogeny in Australian Species
2026-9-29 Vol. 287 Issue 10
Authors: Leah R. Tsang, Paul G. McDonald
DOI: 10.1002/jmor.70182

Issue Information
2026-9-29 Vol. 287 Issue 10
DOI: 10.1002/jmor.70183
