Green Journals

International Approved Journals

Journal Information

Journal Title	Combustion Theory and Modelling
Publisher	Taylor and Francis Ltd.
ISSN	1364-7830
E-ISSN	1741-3559
Database	SCOPUS
Domain	Physical Sciences

Classification History

Year	A+	A	B	C
2026		✓	✓	
2025		✓	✓	
2024		✓	✓	
2023		✓	✓	
2021/2022		✓	✓	
2020		✓	✓	
2019		✓	✓	
2018		✓		

Classification: The table above shows all journal classifications recorded for each classification year in the Green Journals database. A journal may have more than one classification in the same year.

Recent Articles

Data assimilation of a piloted ammonia/air jet flame using the flamelet-generated manifold and ensemble Kalman filter
2026-11-4 Pages 1-27
Authors: Kun Li, Yikai Xia, Chuangxin He et al.
DOI: 10.1080/13647830.2026.2757820

On the optimisation of reaction progress variables in reacting flows using machine learning
2026-10-27 Pages 1-20
Authors: Yan Zhuang, Shijie Xu, Shenghui Zhong et al.
DOI: 10.1080/13647830.2026.2748013

Flameless combustion in the organised turbulent shear layer
2026-10-23 Pages 1-23
Authors: Christopher M. Coats
DOI: 10.1080/13647830.2026.2748011

Evaluation of droplet evaporation models for the large eddy simulation of a turbulent lifted spray flame
2026-10-6 Pages 1-17
Authors: Teng Zhang, Jinghua Li, Yingwen Yan et al.
DOI: 10.1080/13647830.2026.2742345

Correction
2026-10-5 Pages 1-1
DOI: 10.1080/13647830.2026.2743427

Non-premixed supersonic combustion modelling with aerothermal consistency
2026-9-29 Pages 1-26
Authors: Weite Su, Haoyu Lu, Lipo Wang
DOI: 10.1080/13647830.2026.2740811

Numerical investigation of liquefied petroleum gas combustion influenced by an innovative crossflow slot burner for enhanced combustion characteristics
2026-9-17 Pages 1-21
Authors: Sudjan Thanyalak, Kaewpradap Amornrat
DOI: 10.1080/13647830.2026.2731879

Response of soot formation to fuel inlet perturbation in an aero-engine model combustor
2026-8-10 Pages 1-21
Authors: Jinbo Cheng, Yihao Tang, Wang Han
DOI: 10.1080/13647830.2026.2713466

Inclusion of differential diffusion in the conditional source-term estimation (CSE)-direct chemistry framework applied to turbulent hydrogen flames
2026-7-27 Pages 1-24
Authors: Amir H. Mahdipour, Cécile Devaud
DOI: 10.1080/13647830.2026.2705890

A novel split flux method (SFM) to modelling unsteady and steady pool fires with liquid fuels – part 2, wind effects
2026-7-22 Pages 1-29
Authors: Shivakumar Annaiappa, H. S. Mukunda, C. S. Bhaskar Dixit
DOI: 10.1080/13647830.2026.2703513
